Introduction

The Aligates Modern Range of British-built aluminium gates delivers clean architectural lines and a refined, contemporary entrance for any driveway. The flat-top design aligns seamlessly with new posts or existing wall lines, creating a sleek, unified appearance that enhances the look of properties of any age or style.

Crafted with both aesthetics and longevity in mind, each gate is manufactured from high-quality aluminium, offering a low-maintenance solution that will not warp, rot, or rust. This ensures your entrance retains its crisp, modern appearance for years to come, with minimal upkeep required.

Available in a wide choice of colours and finishes, the range can be tailored to suit both subtle and statement designs. Gates can be configured with horizontal or vertical boarding, allowing for anything from a clean, minimalist look to a more striking architectural feature.

A key feature of the Modern Range is the flexibility of slat sizing, giving you control over the final appearance of your gate.

Fully boarded slats are available in 26mm, 65mm, 100mm, 150mm, and 200mm widths.

Open slat options are available in 38mm, 65mm, 100mm, and 150mm widths, with adjustable spacing to control visibility and openness.

For full colour and finish selections, please refer to our Finishes Brochure.
